The Old Mill.

Aftar many a year of wandering, My Hred heart comea lack at will To the play-ground of my childhood, To the old forsaken niill.

Forty years the hornets builded High among the wood brown caves; Forty Springs the blue birds carolled "Neath the tasseled willow trees.

In the awamp the violets cinstered Large and blue as augels eyes, And the bill top crowned with dalsies Reared its proud head toward the skies.

In those happy days gone hy,
Those my hrakes, and those any bushes,
This my air and thin my sky.

Every year the roof grown feebler, Bends it toward the winding stream; Mosses gather on the shingles, Ivies clamber round the beam.

Now the wheel in stilled forever, Its tired pulse has ceased its throbbing, And the brook that windeth by it lies changed its singing unto solding.

Prsinces Notices. Consumption, ITS CURE AND ITS PREVENTIVE, By J. H. SCHENCK, M. D.

Many a human belog has passed away, for whose death there was no other reason than the neglect of known and indispostily proved inceas of cure. Those nearand dear to family and friends are sleeping the dreamless atumber into which, had they cainly adopted and avoided themselvis of his wonderfully efficacions melityres, they would not have fallen.

Dr. Schenck havin his awa case proven that where-ever sufficient vitality remains, that whilely, by his medicines and his directions for their use, is quickened into healthful vitor.

medicates to argument. It is self assuring, which is required to argument. It is self assuring, which was a self-continuous weapons with which the citadet of the unlady is assailed. Proceduring of the cases of consumptions originate and a functionally dissordered liver. With this condition the broughted tubes "symptotic," With this stomach. They respond to the newflitted with the stomach. They respond to the newflitted of the fiver. Here there comes the cultimating result, and the actuing hi, with all its districtions appropriate, of

essing year.

A contrast has been even of with the Chiragon End groun and Query Radron: tome purposed of the latter to invest 50 per and of the latter to invest 50 per and of the latter to invest 50 per and of the linguage of the latter to invest 50 per and of the linguage. The original between the latter to the latter to the latter search of the bonds of this troupancy. The original many the search of the lands, and the search of the lands, and the latter than the latter t The Mandrake Pills are composed of one of Nature's noblest gitts—the Pedepholium Teltatum. They passess all the blood-scarriding niterative properties of calcade, but unlike calculud, they LEAVE NO STING BEHIND." The work of cure is now beginning. The victatest and mucous deposits in the bowels and in the alimentary or nature of selected. The liver, the a clock, is wound up. it arouses from its torpidity. The stomach acts responsively, and the patient begins to feel that be its getting, at last,

A SUPPLY OF GOOD BLOOD.

The Scawest Tonic, in conjunction with the 19th, pertacutes and assimilates with the food. Chylification is more progressing, without its previous to these properties at land, there is no more flatablence, in exacerbation of the stomach. An appetite acts in.

Now comes the greatest libest burifier ever yet given by at haddgent father to suffering man. Schenek's tulminous Syrup comes in to perform its functions and to haster inide compilete the curv. It enters at once upon its work. Nature cannot be ris steal them for the burst. In the father in the composite work. Asture cannot be ris steal to the curve of gathering it prepares them for expectoration, and but far every short time the unlary far vanquished, the rollen throught at its all the digitility of regalated vigor, steps forth to enjoy the manhead or wannahood that was GIVEN UP AN LOST. A SUPPLY OF GOOD BLOOD.

GIVEN UP AN LOST. The second thing is, the patients must stay in a warm room, until they get well; it is almost impossible to prevent taking cold when the buses are alterseed, but it must be prevented or a cire enauth to effected. Fresh in and ribing out, especially in this wellow of the country in the fall and whiter assum, are all wrong. Physicians who recommend that course loss their patients, if their hings are baily diseased; and yet, because they are into home they must not it down quiel; they tures walk about the room as nuclearly as says as the strength will be are, to get up a good circulation of blood. The patients until keep in your prints—the determined to get well. This has a great deal to do with the appetite, and is the great deal to

in good spirits—be determined to get weif. This has a great deal to do with the appetite, and is the great point to gain.

To despair of cure ofter such evidence of its possibility in the worst cases, and most evidence of its possibility in the worst cases, and most evidence of its possibility in the worst cases, and most evidence in the lacely of the worst cure was in these inclear words:

"Many years ago I was in the last alogs of consumptions continued to my bed, and of one I imm my physicians thought that I could not live a week; then the a frowing man catching a terma, beard of, and obts ince the preparations which I now offer to the public, and they mode a perfect cure of mo. It seemed to use that I could flet intered in my lung, and I would apit up more than a plant of offensive yellow malter every morting for a long time. As soon as that began to leave me, and my appetite became so great that it was with difficulty that I could keep from cating loo much. I soon gained my afrength, and that growth the leaves alone, in my agreed the was only threly-seven pounds; my present weight is wo hundred and twenty-flew (225) pounds, and far years I have enjoyed uninterrupted leadth.

Northern Pacific Railroad RAPID PROGRESS OF THE WORK.

The building of the Numbern Pacific Railroad, (begin July last), is being justled forward with great remark from both extremities of the line. Several thousand men are employed in Minnesota and on the Pacific coast. The grade is usually completed 2010 miles westward from Lake Superior; trains are running over 13th miles of finished road, and track-laying is rajuidly progressing toward the castern border of Dakota. Including its purchase of the St. Paul & Pacific Road, the Northern Pacific Company now has 4 13 miles of completed road, and by September next this will be increased to at least 000. and by September next this will be indecased to at least 50.0.

A GOOD INVESTMENT. Iny Cooke & Co. are now aching, and unhesitatingly recommend as a Profitable and perfectly Sate investment, the brist Mortgage Land Grant Gold Ponds of the Northern Pacific Railroad Cranpany. They have 20 years to run, bear Saven and Three-Tenth per cent, gold interest (muse than High cent, currency) and are secured by first and only mostiga, on the ENTIME ROAD AND JTS EQUI-MINEY, and also, as last as the Road la completed, on \$34,000 AOLES OF LAND to every mile of track, in 500 Acres for each \$1,000 though They are eventy from U.S. Twe. Principal and Interest are payable in Gold; Denominations: Company, \$100 to \$5,000.

able in Gold I Demoninations: Coupons, 5 too to 5,000; Registered, 5 too to 5 too too.

LANDS FOR BONDS. Northern Pacific 7 you are at all times receivable at Tan FFR CRIA. ABOME FOR, in exchange for the Company's Land, of their lowest cash price. This renders them practically INTEREST INSTITUTE. The proceeds of all sales of Lunds are sequented to be devoted to the re-purchase and cancellation of the I less Mortage Bonds of the Company. The Lund Grantot the Road exceeds Fifty Million Acres. This immense Sinking Fundwill undoubtedly cancel the principal of the Company's bended delt before it falls due. With their ample security and high rate of increase their crip of investment, accessible to the study which is not represented that The

people, which is the transfer and the people which is the people with the OTHER SECURITIES.—All marketable Stocks and Bonds will be received at their lightest corrent prite in exchange for Northern Pacific Seven-Thirties. Extrems crosses on Money or Bonds received, and on Seven-Thirties sent in return, will be paid by the Froancial Agents.
